OVERVIEW

The North Florida Transportation Planning Organization (TPO) Transportation Improvement Program (TIP) for Fiscal Years 2012/2013 through 2016/2017 begins with preparing a *"List of Priority Projects"* to be used in developing the Florida Department of Transportation's (FDOT) Tentative Five Year Work Program. The *"List of Priority Projects"* identifies potential projects to be funded in the new fifth year (2016/2017) of the FDOT Work Program. However, by creating the Strategic Intermodal System (SIS) and the Transportation Regional Incentive Program (TRIP) in Florida, the *"List of Priority Projects"* now includes potential projects to be funded in other years of the FDOT Work Program under the SIS and TRIP programs. The *"List of Priority Projects"* includes a prioritized listing of state highway, mass transit, aviation, intermodal, enhancement and TRIP projects and was approved by the North Florida TPO Board June 9, 2011.

All highway projects are included in the North Florida TPO 2035 Long Range Transportation Plan Update and have been determined to be conforming and are consistent with the requirements of the Clean Air Act Amendments of 1990 (CAAA) and 40 Code of Federal Regulations Part 51 - "Criteria and Procedures for Determining Conformity."

The North Florida TPO expects all projects currently programmed in the FDOT Work Program to advance to the next phase of development. This will ensure that implementing the 3-C planning process (continuing, cooperative, and comprehensive) in the North Florida TPO area is being implemented, as required by federal and state statutes. If FDOT cannot complete the programmed phase and advance the project to the next logical phase, it is incumbent that the agency provides an explanation to the North Florida TPO.

STATE HIGHWAY CAPACITY PROJECTS

The "List of Priority Projects" identifies potential projects to be funded in the new fifth year (2016/2017) of the FDOT Work Program. The following table reflects state highway capacity project priorities for FY 2016/2017. All projects recommended are included in the North Florida TPO 2035 Long Range Transportation Plan Update.
